| 同种型                 | IgG                                                                                                                                                                                                                                  |
| 注意事项                | SATB1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.                                                                                                                                     |
| 细胞定位                | Nucleus matrix. Nucleus, PML body. Note=Organized into a cage-like network anchoring loops of heterochromatin and tethering specialized DNA sequences. When sumoylated, localized in promyelocytic leukemia nuclear bodies (PML NBs) |
| Clonality           | Monoclonal                                                                                                                                                                                                                           |
