| 细胞定位                | Cytoplasm. Cytoplasm, cell cortex. Nucleus. Lipid droplet {ECO:0000250 UniProtKB:P70196}. Note=Found in the nuclei of some aggressive B-cell lymphoma cell lines as well as in the nuclei of both resting and activated T- and B-lymphocytes. Found in punctate nuclear body protein complexes. Ubiquitination may occur in the cytoplasm and sumoylation in the nucleus. RSAD2/viperin recruits it to the lipid droplet (By similarity). |
| Clonality           | Monoclonal                                                                                                                                                                                                                                                                                                                                                                                                                                |
