背景介绍	This gene is a member of the BCL2/adenovirus E1B 19 kd-interacting protein (BNIP) family. It interacts with the E1B 19 kDa protein, which protects cells from vir ally-induced cell death. The encoded protein also interacts with E1B 19 kDa-like sequences of BCL2, another apoptotic protector. Alternate splicing results in mu ltiple transcript variants. [provided by RefSeq, Mar 2016],
细胞定位	Cytoplasm. Cytoplasm, perinuclear region. Localizes to the nuclear envelope regio n and to other cytoplasmic structures.
纯化	The antibody was affinity-purified from rabbit antiserum by affinity-chromatogra phy using epitope-specific immunogen.
